My dog is great!

Thanks, yes we are all ok here.

Subject: Durango

I realized you were deployed. I'm glad you are there, and I wish I were.
Let me know if there is anything I can help with...

Is your dog OK?

I haven't heard about this one. Not sure who'd planning to be there.

FYI, I'm in Durango helping with the response.

Subject: Fw: CAMEO class Registration!

Do you know who is going to attend this class from a support point of view? Carol Way? You? 25 students is a big number for CAMEO training.

Subject: CAMEO class Registration!

All Agencies:

The Natrona County LEPC is sponsoring a CAMEO (Computer-Aided Management of Emergency Operations) Course on October 5-7, 2015. CAMEO is a system of software applications used to plan for and respond to chemical emergencies. This performance-level course provides training on the fundamental elements of the CAMEO Suite programs as they relate to emergency situations. As such, it includes detailed technical information and hands-on practice of critical elements of the CAMEO system and its associated programs (CAMEO Chemicals, CAMEOfm, ALOHA, and MARPLOT). To better understand how the programs

interface, participants are provided opportunities to practice key procedures that allow users to enhance planning and response activities associated with community risks and facilities. These exercises clarify the connections between the programs and how they can enhance emergency planning and response activities. The software is a free download sponsored by the EPA and can be found on the EPA website at <http://www2.epa.gov/cameo> .

Each student participating in this class must bring a laptop computer and have permissions to load software on the computer. A download link for CAMEO software will be provided to the student prior to the class

IPADS and many tablets are not compatible with CAMEO Software.

The target audience typically includes all types of emergency response personnel including fire, law enforcement, emergency medical technicians, public health officials, hazardous materials professionals, public safety communications representatives, public works officials, and emergency managers. Others who will benefit include those involved with emergency situations such as security personnel, corrections officers, hospital officials, Red Cross volunteers, chemical plant staff, and other employees; including industry personnel, that are associated with emergency planning and response activities.

To register for this FREE training please click here: <https://cameocasper.eventbrite.com> . The class is limited to 25 students. For any questions related to this training please feel free to contact me at the information below.

Thank you,

Theresa Simpson

LEPC Secretary
